

Product Introduction

产品介绍

TUB 系列

此款冰桶采用采用优质拉丝面料打造，数千条坚韧的聚酯线，滴缝织物使充气产品表面平整而坚韧。浴缸周围厚达8cm的隔热屏障能更好的保持温度的变化。

冷水疗法有助于降低核心和皮肤温度，增加储热能力，同时还能减轻训练发作期间受影响组织的炎症反应。收缩血管促进血液循环，身体迅速接触到冷水，血管会迅速收缩，这是一种自然的保护反应。当离开冷水时，血管再扩张，促进血液循环。这种冷热交替的过程有助于改善心血管系统的健康，预防高血压和动脉硬化等疾病。

The TUB Series

This ice bucket is made of high quality brushed fabric, several dry strips of tough polyester thread, drip stitched fabric to make the surface of the aerated product flat and tough.

The 8cm thick insulation barrier around the bathtub can better maintain the temperature change.

Cold water therapy helps to lower core and skin temperature and increase heat storage capacity, while also reducing the inflammatory response of affected tissues during training episodes. Constricting blood vessels promotes blood circulation, the body is quickly exposed to cold water, the blood vessels will rapidly constrict, which is a natural protective response. When you leave the cold water, the blood vessels re-dilate, promoting blood circulation. This process of alternating heat and cold helps to improve the health of the cardiovascular system and prevent diseases such as high blood pressure and arteriosclerosis.

Manuals

操作手册

1. Open up the package and lay the deflated tub on a flat surface.

打开包装, 把没充气的桶放在一个平面上。

2. Open the charging valve port.

把充气阀口打开

3. Insert the air pump nozzle and inflate the tub.

插入气泵喷嘴, 给桶充气。

4. Your tub is now set up.

你的浴缸就安装好了。

5. To deflate the tub, press the air inlet / outlet down and allow the air to escape.

要给浴缸放气, 按下充气阀口, 让空气逸出。

6. Fold up the deflated tub and store in the bag cover.

把放气的浴缸折叠起来, 放在收纳袋里。

After Sales Service

售后服务

售后服务

- 01.收货后请务必检查是否有漏气，配件漏发的情况。
- 02.产品使用后非质量问题无法进行退换。
- 03.一年内如遇产品漏气问题，飞渡可提供修补指导;也可返厂维修（顾客需承担返厂运费）。
- 04.产品在使用过程中产生的磨损而导致漏气飞渡概不负责。
- 05.一年后飞渡可提供付费维修服务 (具体价格需经飞渡评定)。

After Sales Service

- 01..After receiving the product, please be sure to check and inspect whether there is any air leakage, or missing spare parts.
- 02.Products can not be returned or replaced after use without quality problems.
- 03.FEIDU can provide repair guidance in case of air leakage within oneyear from the date of purchase. The product can also be returned to theactory for repair (customers are responsible for costs associated with theshipping and handling to the factory).
- 04.FEIDU is not responsible for air leakage caused by wear and tearduring normal use.
- 05.After the initial first year from the date of purchase, FEIDU can provide a paid maintenance service (the specific price will be assessed by FEIDU repair professionals).
